Professional Experience

Vault Innovation

Custom software and digital product development company
Chicago, IL (Remote) | 2022-2023

- + Developed Next.js/Laravel applications using React, TypeScript, and Tailwind CSS.
- + Built internal pages and admin panels for a growing medical industry startup.
- + Created living style guides to ensure consistent and scalable UI/UX, collaborating with design teams using Figma.
- + Managed projects using Jira in an asynchronous work environment, with daily standups and weekly code reviews.

Floxi Artists

Web development and design agency
Wilmington, DE (Remote) | 2021-2022

- + Utilized a tech stack of Vue, Netlify, and Prismic CMS to rapidly build and deploy websites.
- + Designed and developed responsive, user-friendly UI/UX layouts.
- + Worked directly with clients to iterate on designs and features.

Verbal Plus Visual

E-commerce development and branding agency
New York, NY | 2017-2019

- + Built and maintained e-commerce websites for a diverse client base.
- + Developed and integrated CMS functionality with platforms including Shopify, Contentful, and WordPress.
- + Collaborated with designers to implement desired UI/UX using Sketch, Invision, and Adobe Photoshop.
- + Migrated legacy websites to modern single-page applications, improving maintainability, performance, and traffic.
- + Ensured cross-compatibility with browsers such as IE 10/11, using BrowserStack and VirtualBox.

Independent Work

2017-Present

- + Designed and developed websites for independent clients.
- + Developed custom command line tools and utility scripts.

Education

Hack Reactor
San Francisco, CA | 2016-2017
Software engineering bootcamp
